

GRAZA 53

FORAGE OATS

KEY FEATURES

- | | |
|--|--|
| ✓ Graza 53 is known for its broad, long leaf structure | ✓ High palatability and forage quality are two strong points for this line |
| ✓ Responds best to more frequent light grazing rather than severe defoliations early in the growing period | ✓ Ideal in dryland regions from 400mm plus through to irrigation |
| ✓ Suited to most soil types | ✓ High level leaf rust resistance (DAF Qld 2017) |
| ✓ Early vigour and quick recovery after grazing | ✓ Very versatile oat for grazing/forage or hay |
| ✓ Fast establishment/fast recovery | |

PERFORMANCE

Graza 53 achieves a high degree of dry weather tolerance over other oats of similar maturity. Graza 53 can produce high dry matter production after second and third grazings.

DISEASE RESISTANT AND TOLERANCE

Through breeding selection and over 3 years of trialling, Graza 53 has demonstrated superior resistance to leaf rust in a wide variety of dryland and irrigated sites across NSW and Victoria.

MATURITY

Graza 53 is a new mid-maturity line that is longer than Graza 51.
