ACTIVE CONSTITUENT: MOXIDECTIN 5 g/L
SOLVENT: HYDROCARBON LIQUID 150 g/L

For the treatment and control of moxidectin-sensitive internal and external parasites of cattle.

PASTORAL AG Moxidectin Pour-On for Cattle is an endectocide with efficacy in treating and controlling internal and external parasites in cattle.

PASTORAL AG Moxidectin Pour-On for Cattle is effective in the treatment and control of the following parasites affecting cattle: Gastrointestinal (adult and larval (L4) nematodes) - Barber's Pole Worm - Small Brown Stomach Worm including inhibited larvae - Stomach Hair Worm - Black Scour Worm - Small Intestinal Worm - Thin Necked Intestinal Worm - Hookworm - Nodule Worm - Whip Worm Lungworm - Cattle Tick - Lice - Mange Mites.

PASTORAL AG Moxidectin Pour-On for Cattle is effective in the treatment and aid in control of: Buffalo Fly.

Cattle Tick Control: PASTORAL AG Moxidectin Pour-On for Cattle is effective for treatment and control of cattle tick on cattle, including strains resistant to organophosphates, synthetic pyrethroids and amidines. The persistent activity of PASTORAL AG Moxidectin Pour-On for Cattle prevents the development of

viable cattle tick for 21 days after treatment. For strategic programs treatment at 21 day intervals is recommended. Some engorged females continue to drop for up to three days after the first treatment, and these may lay some viable eggs. This should be taken into account when planning a strategic dipping program.

Buffalo Fly Control: The persistent activity of PASTORAL AG Moxidectin Pour-On for Cattle can be used as an aid in the control of buffalo fly for up to 14 days after treatment.

WITHHOLDING PERIODS:

MEAT: ZERO (0) days.

MILK: ZERO (0) days.

TRADE ADVICE:

EXPORT SLAUGHTER INTERVAL (ESI): ZERO (0) days.

APVMA Approval No.: 69563/61136
